

**TRIED, TESTED AND PROVEN -  
HIAB BRICK AND BLOCK**

**MADE FOR ALL YOUR MATERIAL HANDLING AND DELIVERY NEEDS**

# MAXIMISE YOUR PAYLOAD

Take your material handling business to new heights with the all-new HIAB iX-162 HIPRO or HIAB iX.158 HIDUO. Next-generation loader cranes that are lighter and stronger than previous generations of HIAB loader cranes.

HIAB cranes are designed and built to operate in the toughest working environments, which requires maximum protection for your crane's hydraulic system. Hoses, pipes and cables are hidden and routed inside the boom's steel structure to protect them from accidental impact and potential damage.

- The HIAB iX.162 HIPRO BSS-2 features two hydraulic extensions and is up to 370 kg lighter than its predecessor, while the capacity of the crane has been increased by 10 to 14%. This means more room on the truck for your payload.
- SPACEevo, our next generation control system, comes standard with the HIAB iX-series. SPACEevo is the future of loader crane intelligence and includes many new options and innovations.
- The HIAB iX.162 HIPRO offers an optional, integrated ePTO electrical power system. Its battery pack and electric power unit are integrated directly on the crane base. Installation is quick and simple, and ePTO leaves room on the truck chassis for more equipment.
- Our industry-leading two-year warranty coverage (with an optional third year) is aligned to our five-year steel parts warranty to ensure the continuous working life of your crane. And our proven nDurance paint protection finish will also help your crane last longer.

Now you can increase productivity and meet your business challenges with a lighter, stronger HIAB crane, which has more room for your payload.

### Maximise your payload

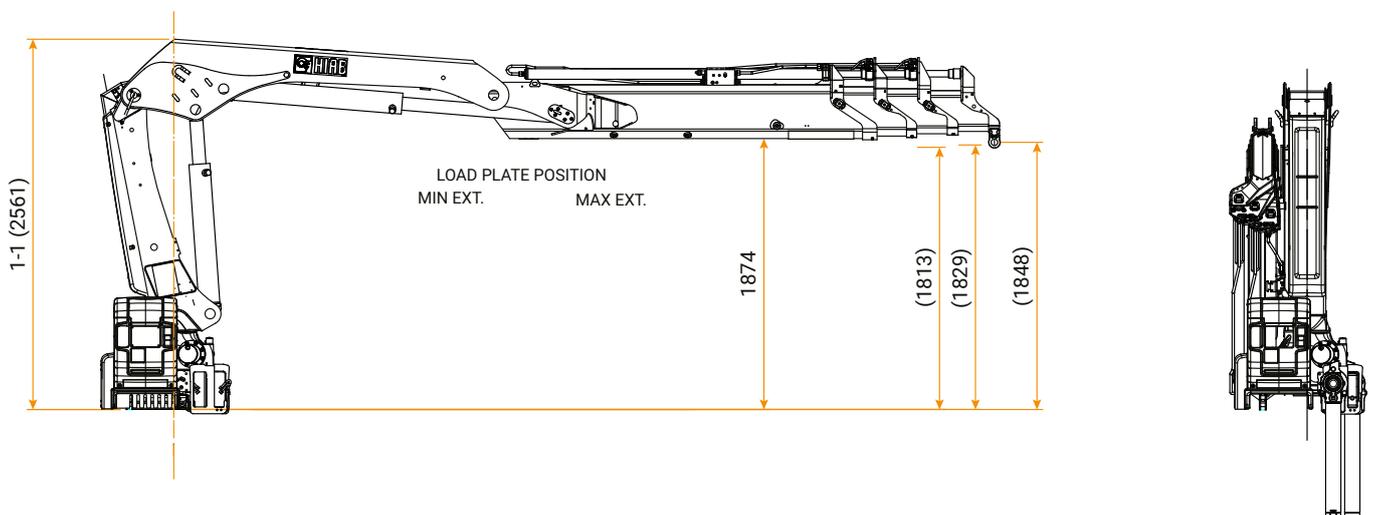

HIAB cranes are designed for situations where maximised payload capacity is required. In building material and brick & block applications, for example.

### Familiar and intuitive

HIAB cranes are designed to be easy and reliable to operate. Many of our customers have multi-driver operations, which means all drivers must be able to achieve maximum productivity from HIAB loader cranes.

### A durable investment

We know that your business and bottom line come first. When you invest in a HIAB crane the money you spend today will be recouped over time since maintenance needs and breakdowns will be significantly reduced.
