

TAIL LIFT OPTIONS

ENHANCE PRODUCTIVITY AND OPTIMISE SAFETY

ZEPRO tail lifts combine industry-leading innovation and durability to optimise each working day. Tailor your lift with options that help to increase uptime, deliver precision accuracy, and minimise risk for the operator and the environment.

ROLLSTOPS

A must if you have loads on wheels. Built in rollstops provide effective protection for both goods and employees.

YELLOW SAFETY LINE

The yellow warning line is a simple security detail to enhance the contrast between the platform and the ground. This is for the user's safety and highlights where the platform ends. A simple detail that can make a huge difference.

YELLOW FEET

A clear marking of assigned operator's position on the platform to reduce the risk of accidents.

WARNING LIGHTS

Increase safety and be seen while loading and unloading with warning lights. These can be mounted on the lift and are activated automatically when the platform is lowered to a horizontal position.

CLEAROIL FILTER

The ZEPRO Clearoil Filter collects dirt, contaminants and condensation, and prevents the formation of ice particles in cold weather. Thereby reducing the maintenance cost and prolonging the life of the hydraulic system.

AUTO TILT

The automatic tilt function automatically tilts the platform at ground level.

RADIO CONTROL UNIT

The radio control is very ergonomic and safe for the operator to use and very easy to install. This will increase the performance and efficiency for the operator handling the daily goods.

FOOT CONTROLS

Control units mounted on the platform for maneuvering with the feet gives full control for the operator to handle the goods.

EXTRA HAND CONTROL UNITS

Extra hand control units are available in several versions for fixed installation, spiral cable or radio control.

SIDE LOADING RAMPS

Aluminium side loading ramps make it possible to load from the platform side and even from docks and pavements. The ramps are available in several sizes.

ADR SPIRAL CONTROLUNIT

For installations in explosive atmospheres the ADR control must be used.

POWDER SURFACE TREATMENT

Premium quality, corrosion protection and long term reliability.

SURFACE TREATMENT SPRAY ZINK

Corrosion and anti-slip protection. Available for steel platforms.

SILENCED PLATFORM (PIEK TREATED)

PIEK certified sound level (60dB) and anti-slip protection.

WEAR PLATES

Wear Plates are stainless steel plates welded on the platform. They take the greatest wear and tear on the ground and protect the coating.

SUPPORT WHEELS

These strong and robust support wheels help to protect the surface of your lift when the platform is tilted towards the ground.

HOSE OVER BEAM

ZEPRO supplies hoses under the beam as a standard solution. If hoses above the beam are a preferred solution, this can be supplied as well.

zeapro.com

Hiab is a leading provider of smart and sustainable load handling solutions. We are committed to delivering the best customer experience every day with the most engaged people and partners. Hiab's premium equipment includes HIAB, EFFER and ARGOS loader cranes, MOFFETT and PRINCETON truck mounted forklifts, LOGLIFT forestry cranes, JONSERED recycling cranes, MULTILIFT skiploaders and hooklifts, GALFAB roll-off cable hoists, and tail lifts under the ZEPRO, DEL and WALTCO brands. As the industry pioneer, Hiab continues to make load handling smarter, safer and more sustainable to build a better tomorrow. Hiab is part of Cargotec Corporation. www.hiab.com
