

MORE YOU THAN EVER HIAB X-CLX LIGHT CRANES

MAKE THE MOST OF

The more your crane can do, the more you can do. And the better it feels to use, the better you feel when using it. That's why HIAB light cranes are so right. They make it seem like there's more of you to go round.

More you than ever.

Hands and mind

Each of our light cranes is carefully designed to help you do more jobs with less effort. All that you need is right at your fingertips – no matter whether you choose manual or remote control. Flawless response and a full range of accessories ensure that your HIAB light crane can do anything you put your mind to.

This brochure focuses on manual control with the HIAB CLX control system.

Built like no other

HIAB cranes offer the market's best performance, which is why they come with the market's best promise. All HIAB light cranes are covered by a comprehensive two-year warranty, with three years on steel structure for CLX models.

Ease of use

The outstanding durability of a HIAB light crane is matched only by its ease of use. The HIAB CLX manual control system simplifies operation to ensure the highest efficiency and productivity.

YOURSELF

Heart and soul

Nothing else feels like a HIAB, because nothing else is built or supported like a HIAB. You get a light crane to depend on, from the quality exterior and hydraulics to a two-year warranty and unbeatable service access.

Not only will you love working with your crane today, you can also count on a high residual value tomorrow.

Longer lifetime

HIAB light cranes are built to perform – today and tomorrow. You have assurance of truly long-term performance thanks to lasting protection from the elements with Hiab's state-of-the-art nDurance coating.

Extended usage

The versatility of HIAB light cranes let you do more than you thought possible. Enhance your crane with any number of our wide range of accessories to really make the most of your equipment – and make the most of yourself.

HIAB XS Drive HIAB XS Drive Lite

With manually controlled HIAB light cranes, there is now the option of faster, smoother control and increased safety with an XS Drive or XS Drive Lite tool. This light and simple remote control means both greater precision and added comfort for the operator.*

* To learn more about the features available for your HIAB light crane, contact your local Hiab distributor.

BUILT TO PERFORM

HIAB light cranes combine strength and reliability with unbeatable ease of use. With their rugged design and proven valve technology, they let you do the job swiftly and move right on to the next.

Lift more, worry less

HIAB light cranes are made to last, whatever the working conditions. With a durable structure of high-tensile steel, they combine low weight with the capacity to deliver heavy loads. Their soft-sealed couplings withstand vibrations and high pressures to minimise the risk of damage.

Always in perfect control

Control is what really makes the difference. HIAB light cranes give you the industry's best, providing a smooth response with robust valve technology.

Our manual cross-control puts the same lever sequence on both sides of the truck. So operation is intuitive no matter where you stand. For even greater freedom – and the best point of view for steering the crane – you can have it with remote control with HIAB XS Drive or XS Drive Lite.

Even the little things matter

Many crane aspects just make life easier, from effortless tilting of the stabiliser legs to a centrally placed column for optimum stability. Our light cranes have load handling valves on all boom cylinders, and maintenance is reduced by smart ideas like slide pads, which need no greasing at all.

Cranes you can trust

Above all, HIAB light cranes leave nothing to chance. We test each of them independently for compliance with European loader crane standards, and our own HIAB standards are even more demanding. We ensure quality, performance and the longest crane life on the market, which is why we can provide the market's only two-year warranty, as well as a three-year warranty on steel structure.

SO MUCH MORE

HIAB light cranes have everything you expect from a top-quality loader crane – and then some. As a result, they let you get more done for the effort you put in.

HIAB CLX gives you robust control

HIAB CLX is a rugged and reliable manual control solution. It has a cross-control setup, which simplifies operation by placing the same lever sequence on both sides of the truck.

HIAB CLX provides rapid response to lever movements, which means jobs can be done quickly – and done well. It can be counted on for many years of top-notch operation, even when working in the toughest conditions.

Remote control with XS Drive / XS Drive Lite

If your work demands even greater control, you can add remote control to your CLX light crane at any point with HIAB XS Drive or XS Drive Lite. This retrofit makes your work easier, faster and safer. One person can do it all, so your operators get more than greater precision. They get greater independence.

Best of all, you get total confidence. XS Drive is Hiab's original remote control for cranes, and it is specifically designed for your equipment. It's the performance you have already come to expect – and then some.

Zinc and organic coating pipes

Extra large slide pads

Load holding valve on all boom cylinders

All cylinders with double chromium rods

Low build cylinder system

Leak-preventing soft-sealed couplings

Column close to center

Hose routing through column

Modular base

- *3-point bridge*
- *Casted slewing house*
- *Flanged cylinders*
- *Standard oil bath*
- *High performance control valves*

The HIAB two-year warranty

HIAB light cranes are built like no other. And they come with a promise like no other: a two-year standard warranty on all cranes, as well as a three-year warranty on steel structure on CLX models.

Every HIAB crane is made with the strongest materials and a quality of workmanship no other supplier can match. And because we build them with care, we stand behind them with confidence. Not only does our warranty cover the components you expect, it also covers the following wear parts:

- Painting
- Seals (both internal and external)
- Flexible hoses

ACCESSORIES THAT ENH

Extend the versatility of your HIAB light crane by adding one or more tools from the wide range of HIAB accessories. Manufactured to the highest standards, they enhance functionality and performance.

Pallet fork

Handling loads with a pallet fork has a number of advantages. Since the load is palletised and lifted from underneath, it is possible to lift many different types of loads – including soft and flexible loads as well as solid ones. A pallet fork is also less expensive than the main alternative, a brick grab.

Earth drills

Robust earth drills are optimal solutions for fencing, road signs, landscaping, tree planting, well borings, screw piles and sound barrier installations. The drills are available in three motor sizes and with a wide variety of auger dimensions up to 1000 mm. Different tooth types are also available, as well as extensions for drilling holes to a maximum depth of five metres.

Bucket

Many different buckets are available for your HIAB loader crane. Your choice depends on what your business – current, and future – is focused on. After all, new business ideas and opportunities do present themselves from time to time. Bucket solutions vary from narrow width digging buckets – suitable when deploying cables, through midsize open buckets suitable for lifting branches as well as digging, and all the way up to large volume scooping buckets, perfect when it comes to shifting large amounts of material.

Multi brush

HIAB Multi Brush is a versatile tool for removing snow from roofs, or sand and gravel from the ground. Easy to operate in a safe way, this tool can save many backs and many hours of manual labour.

Rotator

A sturdy rotator is an important workhorse, especially when it comes to handling heavy or bulky loads with precision. We offer a wide range of gear-type and vane-type rotators, with shaft or flange attachments for connecting them to other accessories.

ANCE YOUR EQUIPMENT

When choosing Hiab Selected Accessories, you can be sure to get the most out of your equipment. Hiab Selected Accessories live up to the market-leading Quality and Performance standards set by Hiab.

BUILT TO PERFORM

HIAB light cranes combine strength and reliability with unbeatable ease of use. With flawless control and smart features to increase safety and speed up your work, they make productivity simple.

Lift more, worry less

HIAB light cranes are optimally built for easy mounting on the truck chassis. The whole installation, including any necessary chassis reinforcements, is designed for the lowest possible overall weight.

To make installing your crane simple and quick, we provide complete documentation including technical data, installation instructions and software for calculating axle loading and stability.

Your time is valuable

HIAB light cranes are designed for easier everyday maintenance. Key parts and components that require regular attention are located where you would expect them, and where they are easy to access. A good example is the integrated oil tank in the crane base, which can be installed without rearranging truck components and is quicker and simpler to reach.

When more is required, our fully trained and accredited service personnel know all there is to know about your HIAB crane. Above all, they know the importance of servicing or repairing it as quickly as possible. With the absolute minimum downtime, they get your product back in business and making a profit.

From parts to people

Original spare and wear parts of the highest quality ensure that your HIAB light crane will always be a HIAB product. In other words, they give you the same functionality, performance and safety you have chosen from the start.

With the largest service network in the industry, you are never far away from our skills and expertise. Like our cranes, our people work harder and go further for you.

Hiab ProCare™ for planned performance

In every way, our aim is to keep you moving so you can deliver as promised. With Hiab ProCare™*, we can take on the burden of inspections, planned maintenance, scheduling and more, giving you the best assurance to produce as planned. Simply choose the level of service agreement that makes sense for your business:

Hiab ProCare™ Inspection makes it simpler and easier to comply with inspection regulations for your crane. With the thorough yet efficient scheduled inspections, it is possible to prevent a number of unpleasant surprises and you are back on the road fast.

Hiab ProCare™ Essentials is the best addition to your new crane, including the preventive maintenance programme and scheduled inspections as recommended by Hiab. Put your maintenance planning in our hands and we keep your crane operating with the original high performance to avoid un-necessary cost and downtime.
