

HDC 33/44

THE NEW GENERATION OF HEAVY LIFTS

A HEAVY DUTY CANTILEVER LIFT WITH A LIFTING CAPACITY OF 3,300 AND 4,400 LBS

An advanced and yet robust design makes this the top line choice for all heavy vehicles wanting to maximize up time. Comes with a galvanized high strength steel frame and an aluminum platform with different size options. Offers a 40" load center designed for maximum stability. The platform replaces the vehicle rear door of the body which saves time for the operator, keeps goods safe, and minimizes up-front costs and door maintenance.

- **Galvanized finish standard:** Extend product lifecycle with the industry-leading corrosion-resistant finish.
- **Aluminum platform standard:** Lightweight and corrosion-resistant. Dual tilt and gravity down lift cylinders for reliable loading or unloading in all conditions.
- **Cart stops as standard:** Cart stops help keep loads sturdy and drivers safe while they make their daily deliveries in busy parking lots.

- **Service friendly:** The new Solid State Relay card helps to simplify electronics while making diagnostics easy for technicians and cutting troubleshooting in half.
- **Low maintenance:** Corrosion protected cylinder rods with bellows extend the life of cylinders. Ozone-resistant thermoplastic hoses extend the lifecycle of the hydraulic system. The power pack is located inside the mount tube to protect it from the elements. An easy slide out tray keeps maintenance quick and simple.
