

WITHOUT A DOUBT HIAB FRAMEWORKS

NO QUESTION MARKS, JUST SPEED AND PERFORM

TOUGHER WITHOUT A DOUBT

HIAB FRAMEWORKS means a rugged subframe with extreme torsion rigidity – for up to 40% greater stability.

The HIAB FRAMEWORKS system is a CE-certified package that takes full advantage of Hiab manufacturing capabilities. Designed for fully automated production, including robot welding and advanced cathaphoresic dip painting, create a lasting subframe with incredible torsion rigidity. The latter limits stress on the truck chassis and works with VSL or VSL^{PLUS} to provide capacity-enhancing stability.

FASTER WITHOUT A DOUBT

HIAB FRAMEWORKS is a modular system that minimises design work and cuts installation time by 75%.

Supplied ready-to-install for a specific truck and crane, a HIAB FRAMEWORKS solution eliminates days of calculation and design hassle, as well as weeks of installation labour. The subframe is bolted on using the included attachment kit, with no welding or grinding involved. Nor is any lateral plating needed on the truck chassis.

PERFORMANCE

Loader crane installation is complex and time-consuming. But it no longer has to be.

Today there is a modular system that gives you a pre-manufactured, ready-to-install subframe, perfectly matched to the chosen truck. Not only is it faster and easier to install, it creates a more stable crane with fully optimised performance.

Introducing HIAB FRAMEWORKS.

SMARTER WITHOUT A DOUBT

HIAB FRAMEWORKS saves you a great deal of effort, but it also saves you headaches by eliminating risk.

Installing a crane in one quarter of the time is a valuable proposition. And so is the opportunity to spend less time on sourcing and quality control.

But HIAB FRAMEWORKS is smart in other ways too. All critical calculations are incorporated into the HIAB FRAMEWORKS system, which leaves all the worry to us.

READY WITHOUT A DOUBT

HIAB FRAMEWORKS is a full package that makes both delivery and future service a simple matter.

A HIAB FRAMEWORKS solution is a complete solution that leaves nothing to chance. As well as the subframe, attachment kit and detailed mounting instructions, you get the oil tank and other key accessories along with the crane itself. That saves you sourcing elsewhere – and means easy access to Hiab spare parts and service down the road.

MUCH MORE THAN A SUBFRAME

HIAB FRAMEWORKS offers a perfect match between loader crane, subframe and truck chassis. You receive everything ready-to-install, along with detailed

instructions on a workshop level. That saves weeks of design and installation time – which saves you money and hassle.

High quality, fast and simple

Your HIAB FRAMEWORKS solution comes straight from the factory, where our advanced serial production ensures the highest quality at an extremely affordable price. The rugged subframe is bolted on directly with no welding or grinding, which reduces installation time by hundreds of hours.

A full-package solution

Your complete HIAB FRAMEWORKS package includes:

- HIAB FRAMEWORKS sub frame
- HIAB FRAMEWORKS attachment kit
- HIAB loader crane
- Different oil tank solutions
- HIAB auxiliary stabilisers
- Variable pump
- Tank supports and other bracketry

HIAB FRAMEWORKS is constantly developing to encompass more crane models and truck brands.

Examples of supported trucks are Volvo, Scania, DAF and Renault. For other truck brands check with your local dealer.
