

TAIL LIFTS BUILT TO PERFORM

DESIGNED EFFICIENT

Businesses in all corners of the world rely on ZEPRO tail lifts. For more than 40 years, ZEPRO tail lifts have set the standard for quality, reliability and serviceability. Our tail lift solutions withstand not only demanding conditions, but also the toughest demands of modern distribution and logistics.

Up and running, whatever the conditions

In any transport business, vehicles are exposed to extremes. Whether your deliveries take you to the snows of northern Scandinavia, the blistering heat and dust of the Gulf Coast, or the unreliable infrastructure of the African continent, ZEPRO tail lifts offer both reliability and stability in even the most tough and varied of climates. This is why we build ZEPRO tail lifts to withstand any conditions – anywhere in the world.

The world's widest range

No matter what you deliver, there is a ZEPRO solution to match your vehicle and challenges. We offer cantilever, sliding, folding, column, and retractable tail lifts, with the widest range of platform dimensions, control unit solutions and accessories on the market. Your choices range from dock lift hydraulic units to side-loading ramps, and lifting capacities are available from 450 to 3000 kg. Essentially, we have solutions to fit every vehicle and every delivery challenge you may face.

It simply has to work

In a world of high customer expectations, tight delivery schedules and an increasing demand for fast turnaround times, you have to be able to trust your equipment from the moment you take delivery. Built with premium components and tested to the most rigorous standards in the industry at our ultra-modern facility, ZEPRO tail lifts are products you can depend on – they're the most reliable tail lifts in the world.

FOR DISTRIBUTION

REAL SOLUTIONS TO REAL CHALLENGES

With their advanced surface treatment and smart component designs, you can expect ZEPRO tail lifts to last. Better still, you can rely on our wide network of service centres and our skilled technical support staff, whose job is to see that your tail lift is up to the challenge.

Resisting the elements

Tail lifts face a tough working environment. They take a beating from water, salt, sand, grit and ice – anything your vehicle might stir up on the road. This is why ZEPRO tail lifts are finished with an advanced four-step process, including an anti-corrosion pre-treatment and a durable coating of powdered polyester. The results are long-lasting good looks and a consistently high resale value.

Premium quality in every part

Hydraulic units and cylinders are the most critical components in any tail lift. ZEPRO hydraulic units are integrated into the steel support frame, which provides additional protection and reduces pump noise. ZEPRO cylinders have nickel-plated piston rods and bellows, as well as threaded cylinder tops that prevent the intrusion of water and dirt.

Quality confirmed

Quality is everything. ZEPRO was the first to be approved according to both ISO 9001 and ISO 14001 certification.

Advanced surface treatment

The finish of ZEPRO tail lifts is as durable as it is attractive.

We produce it in four steps:

- Degreasing
- Steel shot blasting
- Anti-corrosion pre-treatment with zinc-manganese phosphate
- Coating with polyester powder in your chosen colour

Low weight means lower fuel consumption

Measures such as plastic hydraulic oil tanks and platforms of Domex high-tensile steel help ZEPRO tail lifts significantly reduce the weight of the product, meaning fuel consumption is kept to a minimum, not only reducing fuel costs but also reducing effects on the environment.

Always behind you

Besides the advantages of ZEPRO tail lifts, there are advantages to working with the world's top tail lift supplier. Our global network of service centres puts parts and assistance within easy reach, and the experts of our technical support team are just a phone call away. Here at ZEPRO we put a lot of effort into the traceability of spare parts, so whatever you need to keep your vehicle on the road, we are ready to deliver.

A lasting investment

The combination of durability, reliability and top-notch support means lower maintenance costs and fewer headaches. Our team believes in designing and producing the best products possible. Our tail lifts are only delivered, complete with the parts required for installation, after a thorough test run in our factory. And in the end, our commitment to complete customer satisfaction gives you a tail lift with the best trade-in value on the market.

Spare parts information and availability

A particular strength of the ZEPRO organisation is the ease with which customers are assisted with their spare parts requirements. Our comprehensive C Service online parts catalogue is "live" and includes the latest changes applicable for your ZEPRO. The C Parts e-trade system allows distributors to check stock levels and prices instantly online

in order to efficiently and promptly serve customers with information concerning required parts. Various delivery options can be proposed to the customer in order to get the right part to the right place at the right time, all with a view to getting the vehicle in perfect condition again for continued operation.

ALWAYS A ZEPRO FOR YOUR NEEDS

Whatever your vehicle type or lifting needs, finding the right ZEPRO tail lift is easy. In addition to an extensive range of cantilever tail lifts, ZEPRO solutions include truck and trailer sliders, folding lifts, special applications and a wide variety of accessories.

Cantilever lifts

ZEPRO cantilever tail lifts are suitable for small and large distribution vehicles where the platform can be used as the back door. They are available in a number of models and executions that allow them to fit most vehicles on the market. Lifting capacities from 450 to 3000 kg are available.

Model	Lifting capacity (kg)
ZEPRO ZV 50	500
ZEPRO ZHZ 600	600
ZEPRO 45/75	450 / 750
ZEPRO Z 100	1000
ZEPRO Z 10-135	1000
ZEPRO ZV 10/15/20	1000 / 1500 / 2000
ZEPRO Z 250	2500
ZEPRO ZHD 1500-3000	1500 / 2000 / 2500 / 3000

Slider lifts

ZEPRO slider tail lifts are installed under the vehicle chassis and can be used on trucks or semi-trailers. They provide the option of a tail lift when required, but their positioning allows free access to the rear doors of the body. The platform is folded to take up less rear overhang. Lifting capacities from 750 to 2500 kg are available.

Model	Lifting capacity (kg)
ZEPRO ZS 15/20/25	1500 / 2000 / 2500
ZEPRO ZT 15/20/25	1500 / 2000 / 2500
ZEPRO ZSL 150/200/250	1500 / 2000 / 2500
ZEPRO ZD 150/200	1500 / 2000
ZEPRO SZD 75/100	750 / 1000
ZEPRO SZH 100	1000

Folding lifts

ZEPRO ZR folding tail lifts are simple, lightweight solutions that make a tail lift available when needed, but without obstructing access to the rear doors. They require only minimal overhang, which means they can often be installed where a standard lift would fit. Easy to maintain, they have a single, centrally mounted lifting cylinder and an automatic mechanical ground tilt system. Lifting capacities of 1000 kg and 1500 kg are available.

Model	Lifting capacity (kg)
ZEPRO ZR 10/15	1000 / 1500

Special tail lifts

ZEPRO ZCT tail lifts are column lifts specifically designed for link trailers. A cylinder in the top housing pulls wire cables that lift the steel platform, which is available in a variety of lengths and widths. In most models, the tilting cylinders are located under the platform to keep the working area clear. Lifting capacities of 2000 kg and 2500 kg are available.

Model	Lifting capacity (kg)
ZEPRO ZCT 200/250	2000 / 2500

Accessories

A wide variety of accessories let you adapt ZEPRO tail lifts to your specific requirements. These include:

- Control units
- Platform accessories
- Side-loading ramps and drive-over locks
- Access option and access ladder
- Roll stops and warning lamps
- Tow hook
- SmartPower
- Rubber seals and guide bar

BUILT TO PERFORM

Hiab is the world's leading provider of on-road load handling equipment. Customer satisfaction is the first priority for us. Hiab's product range includes HIAB loader cranes, JONSERED recycling and forestry cranes, LOGLIFT forestry cranes, MOFFETT truck mounted forklifts and MULTILIFT demountables, as well as DEL, WALTCO and ZEPRO tail lifts.
