

Telescope booms T 10 i and T 12 i

Product features

Telescope booms T 10 i and T 12 i

Changing the hoses is extremely fast and can be done by a single person even on the field. The telescope weighs about 425 kg, so only a little more than the traditional structure equipped with external hoses. It also fits into cranes equipped with hydraulic scales and load holding valves.

Hard chromium plated axles

Hard chromium plated axles can withstand wear. The lubrication interval is long thanks to bearings with grease pockets.

Large hose rolls

The telescope includes large hose rolls where the hoses remain and can move easily. The bending radius of the hoses is large and wear is minimal.

Polyurethane hoses

The polyurethane hoses reinforced with aramid fibre and steel wire braid are flexible even at low temperatures and endure aging well.

The fastest hose replacement on the market

Well protected hoses

The hydraulic hoses are well protected within the boom system. This keeps maintenance costs down and increases productivity. The highly wear resistant hoses have an impressively long service life and are easy to change.

Choose the right telescope for your crane

The telescope T 10 i fits into the cranes:

- Hiab Loglift 82 S
- Hiab Loglift 96 S
- Hiab Jonsered 900 R
- Hiab Jonsered 1100 R

The telescope T 12 i fits into the cranes:

- Hiab Loglift 105 S
- Hiab Loglift 120 S
- Hiab Jonsered 1080
- Hiab Jonsered 1300 R

Hoses inside the boom

The telescope hoses are inside the boom system, protected from external blows and sticking.

Protected hose connectors

The hose connectors are protected under a removable case. The material of the slide bearings in the extensions is plastic that stands heavy loads. The lubrication interval is long thanks to the lubricant absorbed in the slide bearings.

Sturdy leaf chains

Sturdy leaf chains have been selected for heavy use. The cup springs in the chain attachment absorb shocks. The tightness of both chains can be adjusted.

Sales and Service network

Cargotec's global network offers extensive services that ensure the continuous, reliable and sustainable performance of our equipment. We have the most comprehensive distribution network in the industry, supporting all Hiab's customers – through sales companies in 23 countries and 65 independent distribution partners, giving us more than 1500 sales and service outlets. This service network guarantees that we are always close to our customers, ready to give advice on applications and provide service and spare parts.

Learn more about us

Hiab is the global market-leading brand in on-road load handling solutions. Customer-driven Hiab on-road load handling products and solutions are utilised in moving goods and materials on the road, for example in construction sites, forests, industry, waste handling, recycling and by the defence forces.
