

THIS IS HIAB

EMPOWERING YOUR LOAD HANDLING SUCCESS

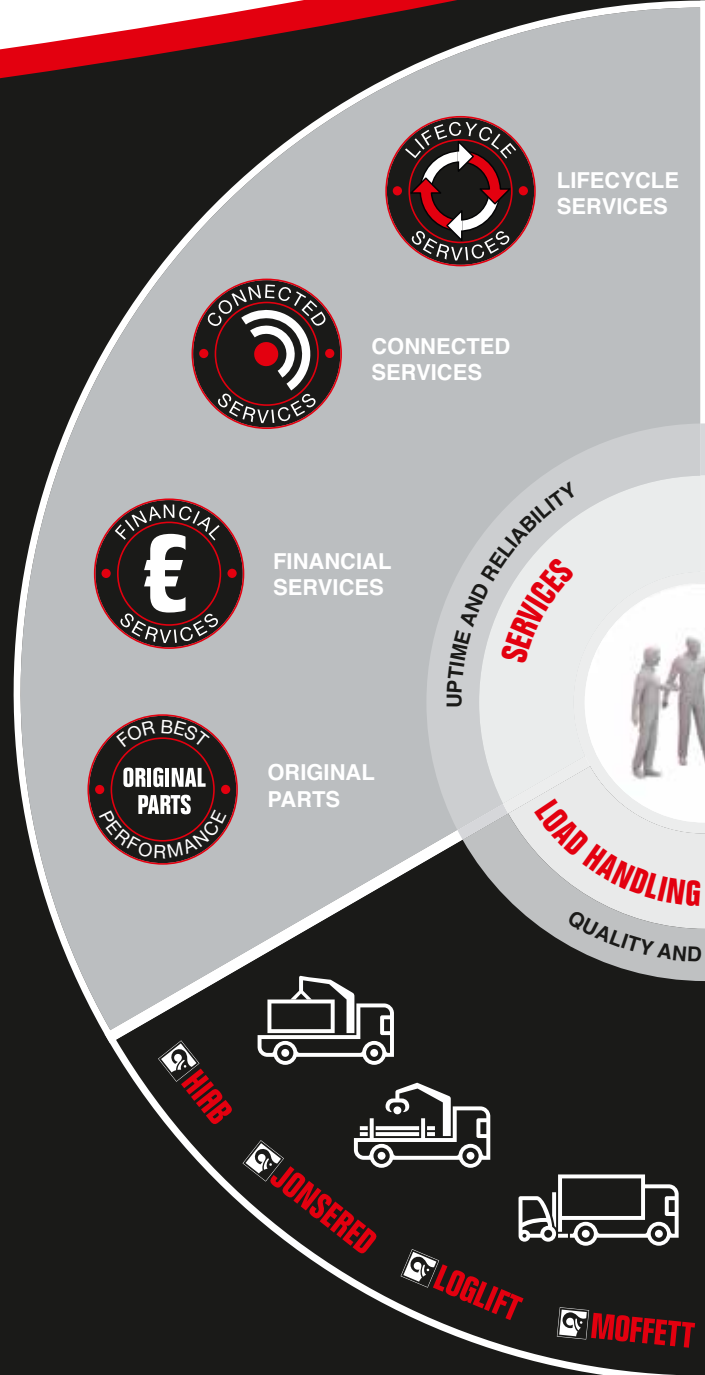

HIAB

PIONEERING THE FUTURE OF LOAD HANDLING

At Hiab, we believe load handling empowers progress. As the global leader in on-road load handling equipment, intelligent services and smart solutions, our whole story is about pioneering new ways to help our customers unlock higher performance.

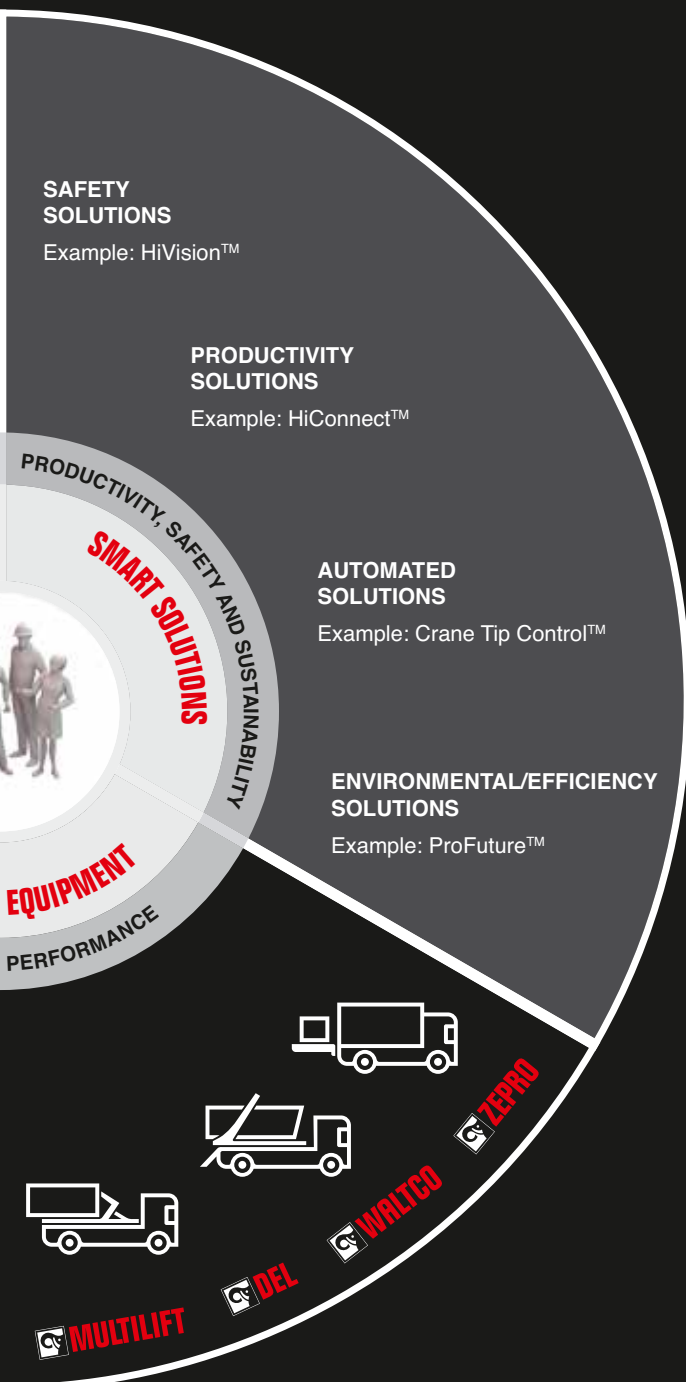

75 years of innovation

Born in a Swedish forest in 1944, we created this industry to meet customer needs. From the invention of the first hydraulic crane, the history of our innovations is tied to our customers' success as we've continually worked to make load handling more efficient, safe and productive.

Lifting today's performance

Through the years, as urbanisation, population growth, energy demands, and digitalisation have accelerated change, we've continued to innovate to keep our customers one step ahead. Today, we serve a wide range of industries and applications with a commitment to quality, safety and sustainable solutions.

Pushing tomorrow's potential

As pioneers in on-road load handling, Hiab understands that the best way to shape the future is together with our customers. Being the trusted partner to large and small fleet-owning companies with diverse needs, we collaborate to find solutions for today's business challenges and tomorrow's potential. The result is constant innovation, like the award-winning HiVision™ crane operating system.

We are built to perform to keep everyday life moving and empower progress.

Total offer for load handling success

Hiab's decades of experience are built into a modern offer that takes every angle of load handling performance into account. Our total offering combines class-leading load handling equipment, best-in-class services and smart, connected solutions. Altogether, we serve customers across the lifecycle, creating value with reliable uptime, safer operation and more efficient business operations.

BOOST LOAD HANDLING SUCCESS WITH CLASS-LEADING EQUIPMENT

Hiab's load handling equipment is represented by eight specialist product brands.

Together, they form the world's strongest offering in on-road load handling equipment.

Loader cranes

HIAB developed the world's first loader crane in 1944, and today there is a HIAB for almost any task. A HIAB loader crane lets you load and unload without additional equipment, performing a wide range of lifting, manoeuvring and manipulating tasks.

HIAB loader cranes are available in a wide range of lifting capacities – from one to ninety tonnes. They are available in a variety of control systems – from the simple manual control that's easy to operate to the expert remote control system for versatility and precision.

- Municipality services
- Recycling
- Road construction
- Defence

Forestry & recycling cranes

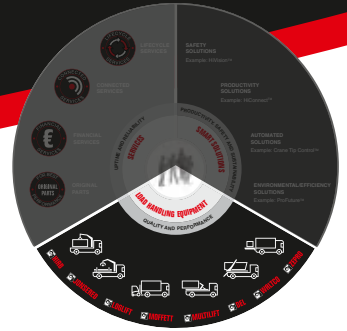

Whether you are transporting timber or doing heavy recycling, you can always stay productive with rugged and reliable LOGLIFT and JONSERED forestry and recycling cranes.

From full-length to cut-to-length timber, we help you move any load efficiently to the pulp, paper or saw mill, any time of year in any weather. Built for forest people by forest people, our cranes are well adapted for timber handling with solutions to support cost-efficient and sustainable operations.

Working with recyclables is tough. A high-performing, speedy and durable crane is vital for long days of continuous operation with intense load cycles. Our recycling range is developed to support you day in and day out.

- Timber handling
- Heavy recycling

Hooklifts & skiploaders

MULTILIFT offers a wide range of hooklifts and skiploaders suitable for all your needs – whether you need to move bulky materials, high-volume waste, gravel, metal scrap or containerised equipment.

A MULTILIFT hooklift or skiploader provides market-leading productivity, reliability and safety – giving you the edge over container-handling challenges. All products from MULTILIFT are designed for a long life at maximum efficiency. An extensive list of standard features ensures MULTILIFT's speed and power in container handling.

- Gardening
- Road construction

Truck mounted forklifts

A MOFFETT truck mounted forklift lets you deliver to any type of site – quickly, efficiently and safely. The driver can unload cargo without waiting for assistance and transport it to precisely where your customer needs it.

Because it conveniently fits at the rear of the truck or trailer, it doesn't take up any of your precious load space. It is easily dismounted and ready to go to work in under a minute. You make more deliveries in less time.

- Recycling
- Poultry/Live haulage
- Road distribution
- Outside to inside deliveries

Tail lifts

Tail lifts play a crucial part in today's distribution chains as lead times get shorter while safety and environmental aspects get tougher. With uncompromising quality and reliable performance, we help you handle the toughest demands of modern road distribution. Always ready for challenging conditions, you'll find our tail lifts everywhere from urban jungles to the frigid Arctic to the blistering heat and dust of the desert. And in every condition, safety comes first.

Our focus is lasting value over the whole lifetime of your equipment. With a total solution comprising installation, service and parts, we meet not only your load challenges, but your business challenges, too. Explore the industry's widest selection under the ZEPRO, DEL and WALTCO brands.

DELIVER AS PROMISED WITH HIAB SERVICES

Lifecycle Services

Support from installation and predictive maintenance to extended lifetime

We provide world-class services and support from the initial installation and training and throughout the entire product lifecycle. With a flexible service contract that fits your daily operations and a range of other services, we help you extend the lifetime of your equipment.

Connected Services

Keeping you one step ahead with next-generation intelligence

Gain the business intelligence you need to unlock increased efficiency, productivity, and safety. With Connected Services, you can know in real time if there's risk for unplanned downtime, stay ahead with predictive maintenance and more.

Original Parts

Ensuring your high-performance Hiab investment stays that way

Hiab Original Parts ensure that your Hiab product stays a Hiab product. Keep the same functionality and quality you invested in from the start – essential for optimal performance, maximum safety and avoiding costly downtime.

Our parts are manufactured to the highest standards. They are specially designed for our equipment, guaranteeing perfect fit and the quality necessary for top performance.

You'll find Hiab Original Parts for fast order via our Hiab web shop. Our optimised stock and logistics ensure next-day delivery on almost all items, saving you time and cost.

With Hiab Services, we are here for you throughout your equipment lifecycle, giving the uptime and reliability you need to deliver as promised. With the latest tools, connectivity and a wide network of experts, we support you whenever and wherever you need us. Hiab Services comprise four service areas that keep you running as planned and improve your planning.

Hiab ProCare™

A flexible service contract designed to secure the uptime of all Hiab equipment. Scheduled and preventive maintenance helps your equipment retain the same high quality you invested in from the start. Using original spare parts and the highest standards, our global service

Hiab ProCare™ levels

Available in several levels, Hiab ProCare keeps you moving forward to deliver as promised.

INSPECTION

The certificates of function you need

ESSENTIALS

Basic service that is easy to plan

TOTAL REPAIR AND MAINTENANCE

Just keep going

network takes professional care of every piece of your equipment, reducing the risk of costly breakdowns and unexpected downtime. By reducing total cost of ownership and increasing the re-sell value of your machine, ProCare brings you total peace of mind.

ENHANCE VALUE WITH HIAB SMART SOLUTIONS

Safety Solutions

**Next-generation technology
lifting safety to new levels**

For Hiab, safety comes first. We continually look for smarter ways to help protect you, your equipment, and the people and communities you serve. Using the latest technology, our Safety Solutions make it easier to work hard and come home safe every day.

Example: HiVision™

Award-winning HiVision for forestry cranes gives the operator control from the safety of the truck cabin using Virtual Reality goggles, electronic joysticks and connected cameras.

Productivity Solutions

**Solutions for efficient operation
and fleet optimisation**

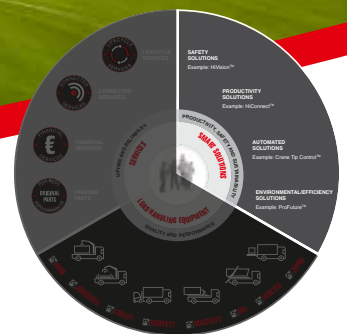

Boost productivity with intelligence and efficiency tools right at your fingertips. With usage insights, proactive planning and maintenance tools and more, we help unlock new levels of performance for your equipment.

Example: HiConnect™

Our connected service helps you actively optimise performance and maximise uptime with real-time insights on equipment utilisation, operation and condition.

Building on the foundation of our class-leading load handling equipment and best-in-class services, with Hiab Smart Solutions you can take things to the next-generation level. Integrating seamlessly into your operations, discover how easy it is to use data, technology and innovative thinking to enhance value in your machines and your business.

Automated Solutions

Integrated systems for automated or semi-automated operation

Take on more advanced operation tasks. Free up time to carry out more tasks during the day. Improve control to ensure both goods and equipment are handled safer and more efficiently.

Example: Crane Tip Control™

With Crane Tip Control™, the operator controls the behaviour of the crane tip instead of each crane function (slewing, first boom, second boom, extensions), making the operation easier and safer.

Environmental/Efficiency Solutions

Savings on all sides

Hiab is the global leader in certified Environmental/Efficiency Solutions. From the world's first lithium-ion powered truck mounted forklift to our WALTCO solar charger and more, we innovate to continually beat emissions criteria and lower your operating costs.

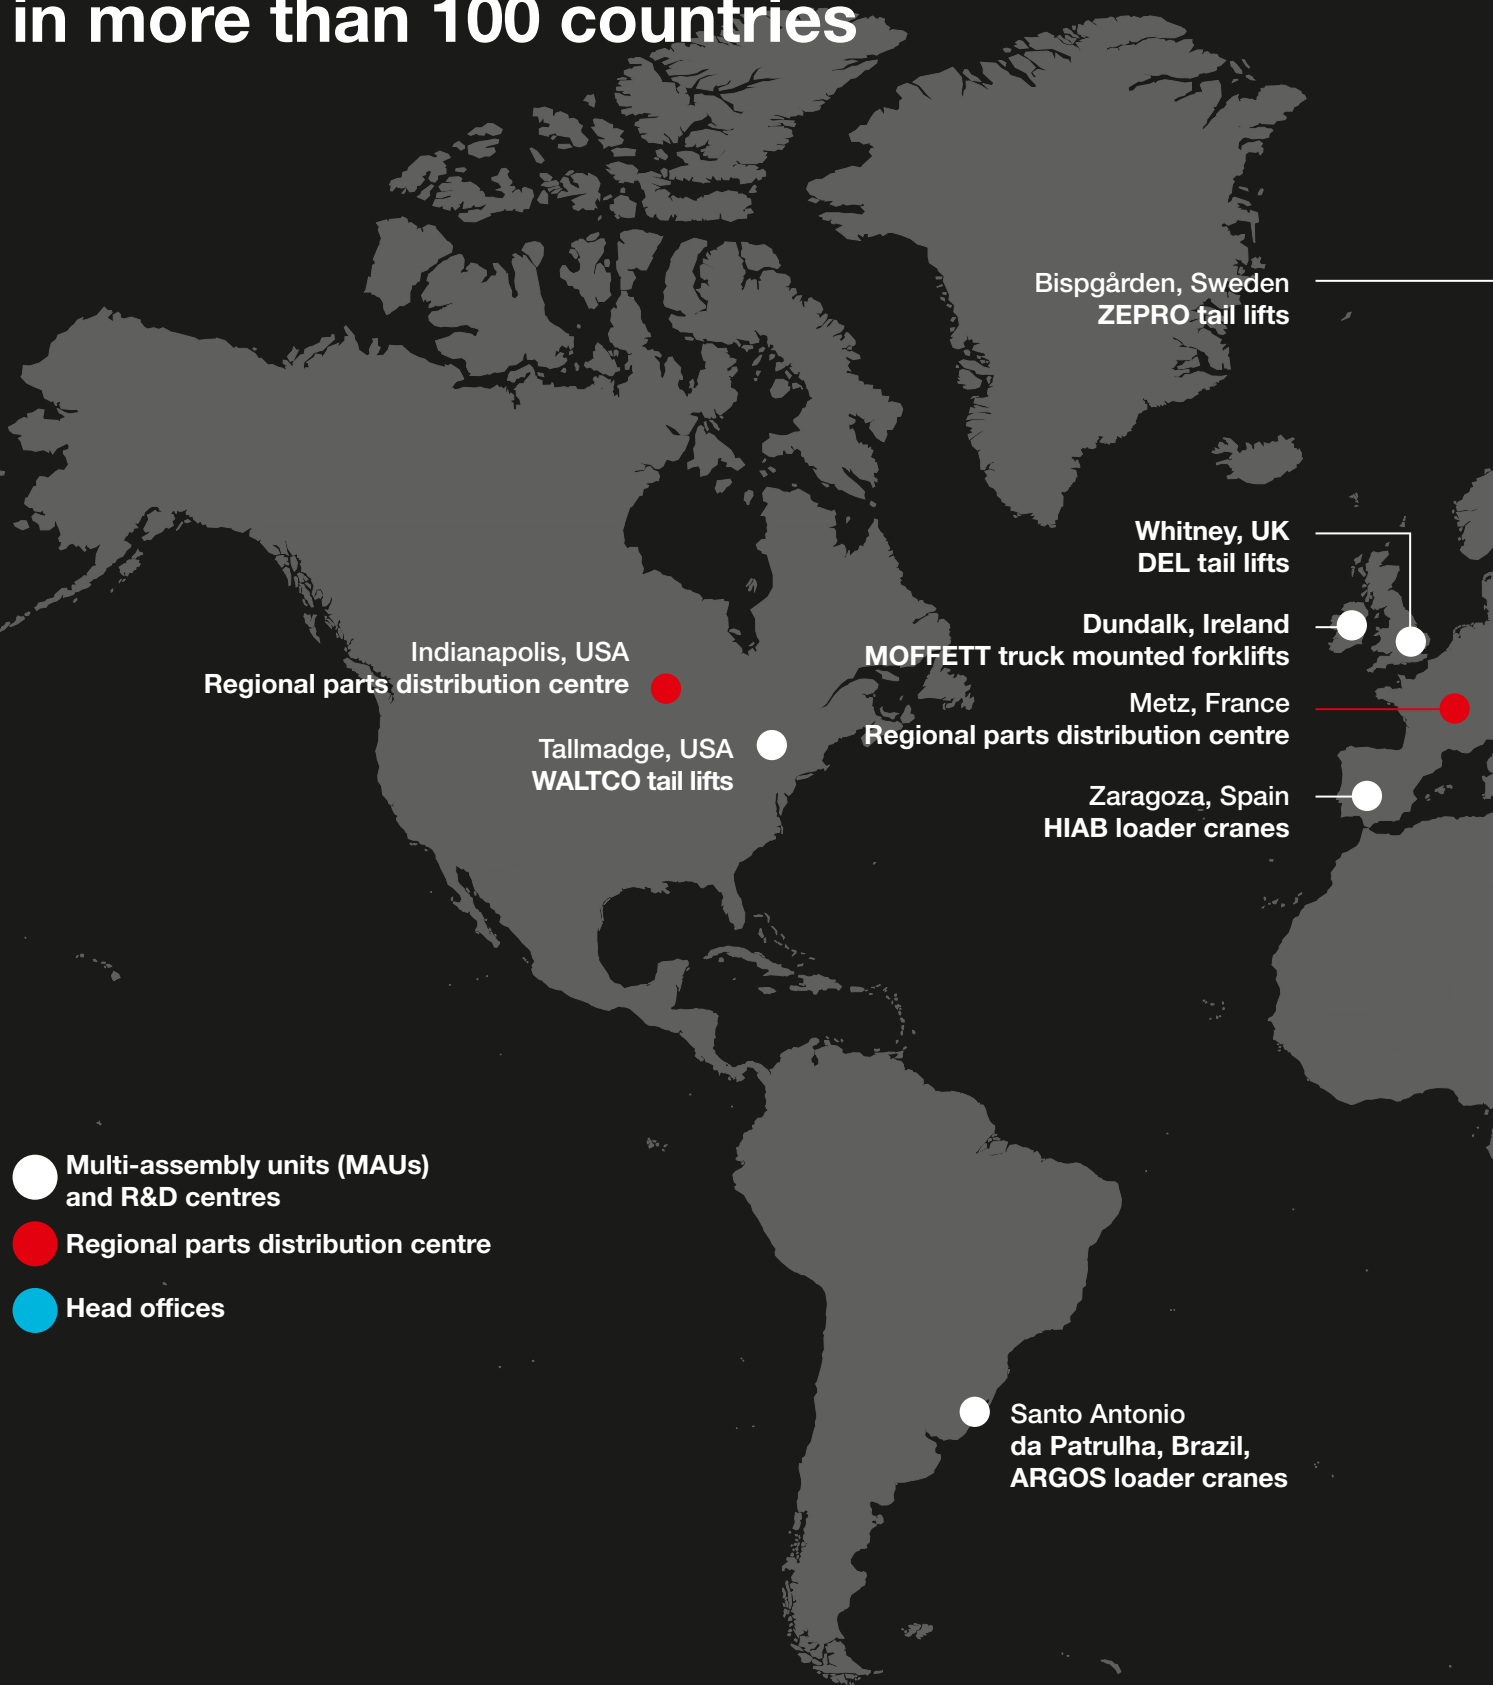

Example: ProFuture™

ProFuture equipment offers lower dead weight and regenerative systems for reductions in CO₂ emissions, noise, and fuel consumption, along with quicker operation to get more done in less time using less energy.

A GLOBAL PARTNER WITH

Sales & Services and distribution network
in more than 100 countries

LOCAL PRESENCE

We aim to support you whenever and wherever you need us. As the world's leading provider of on-road load handling equipment, intelligent services and digitally connected solutions, we've positioned ourselves to be close to our customers locally while offering all the benefits of working with a global company.

BUILT TO PERFORM **WITH PASSION TO SERVE OUR CUSTOMERS**

The heart and soul of our business is finding new ways to help our customers succeed. In everything we do, we make sure we are built to perform so you can outperform – yourself and your competitors.

Our professional Hiab sales and service representatives are at your service, ready to tailor a Hiab offer that suits your needs, helps you deliver on your promises, and boosts your business. Ready to shape a more successful future?
