TIMBER / LUMBER

MOFFETT AT WORK

- TIMBER / LUMBER

Building sites are busy places with rough and muddy terrain, where safety is the priority. Park your truck off-site and deliver safely, easily and quickly with a MOFFETT Truck mounted Forklift.

The ability to position supplies exactly where your customer requires them will give your business a big competitive edge.

Timber & Engineered Timber

For more than 45 years, MOFFETT has been manufacturing Truck mounted Forklifts, a load handling solution that has helped transform the way materials are distributed across the globe.

The MOFFETT is designed for heavy products and long loads such as pallets of timber and roofing material. The All-wheel drive ensures you don't get stuck in the mud and gives excellent traction and stability. Using a MOFFETT also saves the wear and tear on your truck by keeping it off-site and helps to improve delivery scheduling.

Delivering to a building site traditionally involves the driver waiting until a forklift or other off-loading equipment becomes available. MOFFETT Truck mounted Forklifts give the driver complete independence – enabling them to handle a whole range of building products quickly and efficiently, without any additional loading devices.

On site, your Truck mounted Forklift is ready to get to work in less than a minute. Your MOFFETT Truck mounted Forklift can be carried on the back of almost any truck or trailer with no loss of load space.

Having a MOFFETT Truck mounted Forklift means you can have faster, safer and more cost effective deliveries. Our patented 'LIFT ASSIST®' system with one side offloading, consists of a pantograph reach device, or telescopic forks and lift assist arms, removing the need to back out the truck or trailer, turn it around, manoeuvre it back in and continue to unload from the other side.

With its high lift capacity, robust design and a wide range of attachments such as clamps, different fork options and positioners, the MOFFETT Truck mounted Forklift easily handles all timber products weighing up to 3500 kgs on site efficiently and safely.

- No loss of load space
- No waiting for a customer's or supplier's forklift
- Flexibility and control of delivery schedules
- Higher productivity
- Creates time to make more deliveries
- Delivery where needed, precise load positioning
- Reduce product damage
- Safe and easy to use
- A proven competitive advantage
- Up to 3500 kg lift capacity

- M4 20.3/4, M4 25.3/4
- M5 20.3/4, M5 25.3/4
- M8 25.3/4, M8 30.3/4, M8 35.3/4
