

Hiab Moffett Truck-Mounted forklifts

Remote Ground Mount™ System

Hiab Moffett Remote-Controlled Ground Mount™ System for Truck-mounted forklifts

The first Remote Control System for Truck-mounted forklifts has received great feedback from users worldwide. Cargotec, industry pioneer and market leader, has successfully added another outstanding feature, enhancing the most advanced model range.

The easy to use remote control handles mounting / dismounting, providing added safety and convenience for the busiest delivery schedules. This unique concept saves even more time, as it eliminates accessing the unit when mounted.

The alternative to conventional mounting / dismounting

Whatever the application, the Ground Mount™ System allows the operator to conveniently and safely dismount / mount the Truck-mounted forklift from ground level in under 60 seconds by simply using a wireless remote control.

Using the most advanced Truck-mounted forklift technology, the Ground Mount™ System eliminates the need to climb the truck / trailer when getting ready to mount / dismount the unit:

The Truck-mounted forklift is safely accessed through 3-point contact, on the ground or when mounted. However, depending on the chassis height or the ground clearance of the vehicle, the unit could be at a height of more than a metre when mounted.

The Hiab Moffett Ground Mount™ System is the solution for trucks and trailers with high clearance / chassis height.

It is also recommended when the forklift is top-mounted, as the driver / operator no longer has to climb the truck to access the forklift for mounting and dismounting.

Dismounting / Mounting Process:

- > Enter start-up code on the keypad of the remote control
- > After the engine is started, the hydraulic functions for dismounting / mounting are operated via the key fob
- > The park brake function is automatically applied whilst the keyfob is used
- > Within 60 seconds the Hiab Moffett is at ground level, Ready to be used or safely stored on the truck / trailer for transport to the next delivery site

Cargotec improves the efficiency of cargo flows on land and at sea - wherever cargo is on the move. Cargotec's daughter brands, Hiab, Kalmar and MacGregor are recognised leaders in cargo and load handling solutions around the world. Cargotec's global network is positioned close to customers and offers extensive services that ensure the continuous, reliable and sustainable performance of equipment. Cargotec's sales totalled EUR 3.1 billion in 2011 and it employs approximately 10,500 people. Cargotec's class B shares are quoted on NASDAQ OMX Helsinki under symbol CGCBV. www.cargotec.com
